

Javier Quiroga

UX/UI Designer

07413 174457 | contact@javierquiroga.com | www.javierquiroga.com | github.com/cd-javier

UX/UI Designer with a development background. I run the full design process and build in React and TypeScript. My background spans both sides of the handoff, so I design with an eye for what's actually buildable, and use AI-assisted development to move faster without losing design control to the tool.

Work Experience

UX/UI Designer & Developer

Freelance | London, England

12/2022 - Present

Klear Labs — Café Website & Shop (2026)

- Directed visual identity end-to-end with AI-assisted development (Lovable); caught and fixed structural inconsistencies the tool's output missed (duplicate components, unenforced type hierarchy).
- Shopify-integrated shop live at klear-labs.com

Matthew CT Fuller — Personal Website (2026)

- Designed and built end-to-end in React 19, TypeScript, and Sanity CMS; client manages all content independently.
- Live at matthewctfuller.com

LESGO — LGBTQIA+ Dating App (2024)

- Rebuilt visual identity: colour system, typography, and iconography; structured a component library using atomic design principles, with full dev handoff specs.
- Redesigned navigation and multi-mode switching, validated through user testing; restructured into four clear sections for UK market launch.

WAW Lifestyle — Wellness App (2023)

- Restructured information architecture from scratch using heuristic evaluation and user testing; sold findings to a resistant client with data.

General Manager (promoted from Barista to General Manager)

Ole & Steen | London, England

03/2020 - 06/2022

- Grew High Street Kensington into the best-performing UK store in Q1 2022, and broke sales records in first month as GM.
- Managed 20+ staff, promoted 3 into management.
- Designed and successfully implemented a train-the-trainer programme covering 80+ baristas across 20 stores.

Education

Full Stack JavaScript Web Development

The Odin Project | London, England

12/2024 - Present

- Self-directed full-stack curriculum covering React, TypeScript, JavaScript, HTML, CSS, and Git.

UX/UI Design Bootcamp (Full-time)

Ironhack | London, England

08/2022 - 10/2022

- 3-month full-time bootcamp covering the full UX process: research, information architecture, wireframing, prototyping, and usability testing.
- Shipped product features end-to-end in team sprints using Design Thinking and Agile.

Audiovisual Communication

Universidad Complutense | Madrid, Spain

09/2011 - 06/2015

Technical Skills

Design: User Research, Wireframing, Prototyping, Design Systems, Accessibility (WCAG)

Code: React, TypeScript, JavaScript, HTML, CSS, Git/GitHub, AI Assisted Development

Tools: Figma, Claude Code, Lovable, Sanity CMS, Adobe Creative Suite

Languages: Spanish (Native), English (Bilingual), French (Fluent), Japanese (Beginner)
